Overview

When do I need to create a WibuCmRaC file?

Thank you for choosing CodeMeter! We require a WibuCmRaC file to activate the features in your FSB (Firm Security Box) in these cases:

- First activation of your individual Firm Code in an FSB (all Firm Codes)
- Change of the license model between you and Wibu-Systems
- Renewal of licenses for CmDongle (1xx.xxx) or CmActLicense (5.xxx.xxx) Firm Codes. This is not required for Universal Firm Codes.

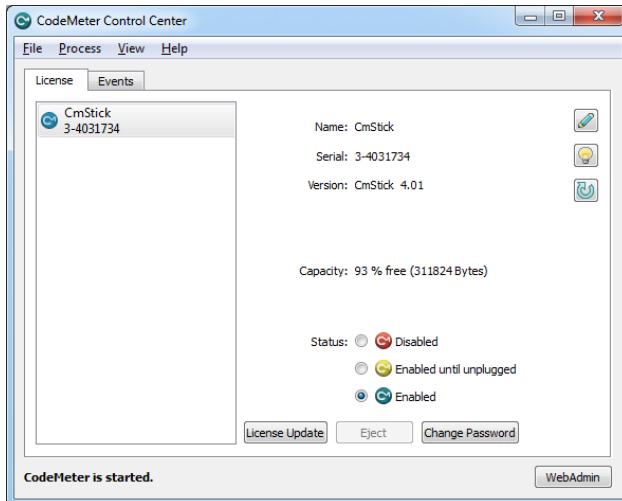

Please follow these instructions to create a WibuCmRaC file that you should send via email to license@wibu.com or your sales representative. You will then receive an email with the next steps for activation.

Prerequisites

Please install the CodeMeter SDK. You can [download it directly from our website](#) once you are registered, or via the Quick Start Guide available on the CodeMeter Developer Portal at <https://license.wibu.com>.

Step-by-Step Instructions

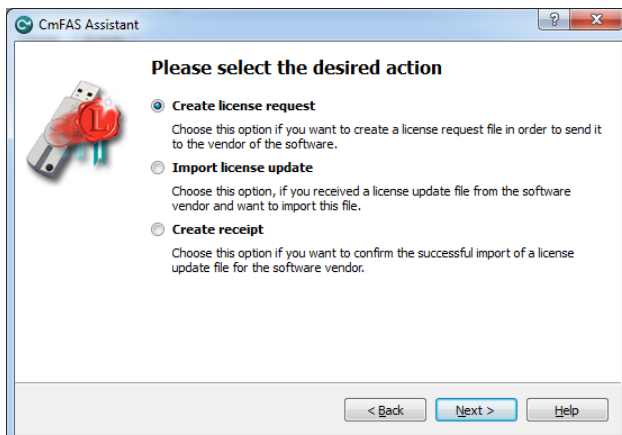

Please select the CmDongle from the CodeMeter Toolkit that is marked FSB and connect it to your PC. Now open the CodeMeter Control Center in the task bar, in the start menu, or with your desktop search function.

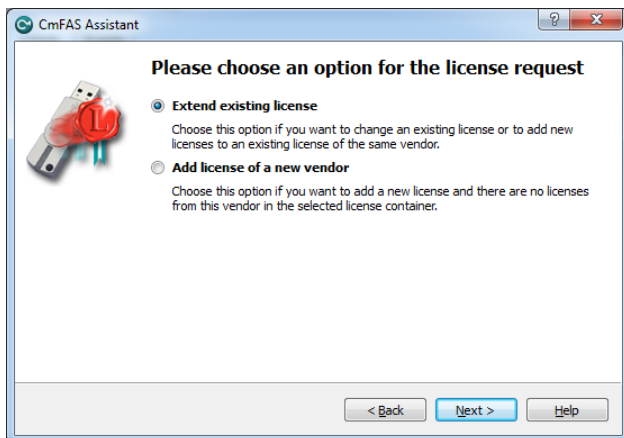

Select the CmDongle and click on “License Update”. The CmFAS Assistant will open.

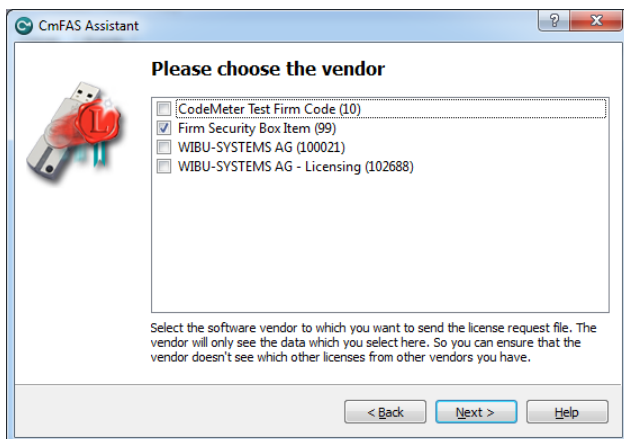

Confirm the welcome page by clicking “Next”.

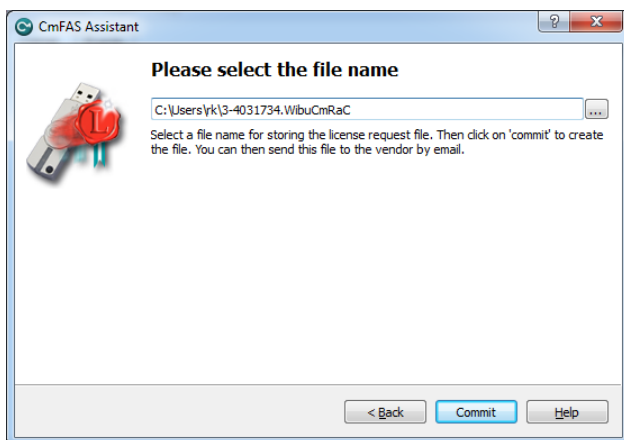

Select “Create License Request” and click “Next”.

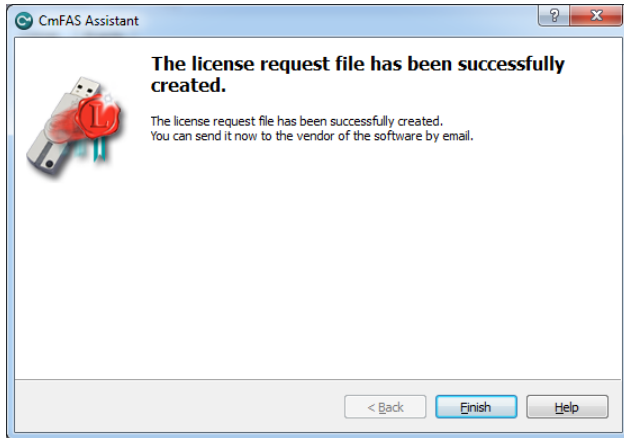

Select the option “Extend Existing License” and click “Next”.

Select Firm Security Box Item (99) from the list of available vendors and click “Next”.

Choose the file name under which the license request file is to be saved. Remember the file name and click “Commit”. A license request file (“*.WibuCmRaC”) will be created and saved automatically.

You can complete the process by selecting “Finish”.

You can now send the license request file by email to license@wibu.com or to your sales representative.
