Introduction

CodeMeter License Central – Ticketing System

Some Definitions

■ Activation

- Transferring a license into a CmContainer, if was not activated yet
- Transferring a license into a CmContainer, after its confirmed de-activation

■ De-Activation

- Transferring a license from a CmContainer back to CodeMeter License Central

■ Re-Activation

- Transferring a new-generation-license into a CmContainer, if the previous generation wasn't successfully deactivated
- Usually, the old generation will be invalidated at this time

■ Auto-Update

- An update that is bound to a CmContainer and thus doesn't need a ticket for the first activation
- Options:
 - **New** (Assigned license)
 - **Edit/Change** (Replacement)
 - **Delete/Lock** (Withdraw, recycle, or blacklist honey pot)
- Execution options:
 - Automatically in the background with every other activation / de-activation / re-activation
 - Independently via License Portal (manually) or Activation Wizard (automatically)

Generic Settings

- Definition of CodeMeter Container Types
 - CmDongle, CmActLicense, CmCloudContainer
 - TMR Container
 - Custom Licensing Adapter, CmCloudLiteContainer
- Global Settings
 - De-Activation allowed
 - Re-Activation behavior (Withdraw, Blacklist)
 - Honey Pot Item
 - Automatic Update Handling

Item Creation

- Maps **business** terms
 - License models
 - Item ID, SKU, Material ID, ...
 - Name
- to **technical** properties
 - **Container Type**
 - Firm Code and CmActID
 - Product Code
 - Product Item Options

Ticket Creation

- Manually in the User Interface
- Automatically via SOAP/REST
 - Third party software (ERP, CRM, e-Commerce)
 - Self written application
 - **Generic Connector**

```
GenericConnector.php
```

```
?user=sales&password=sales
```

```
&orderid=&customerid=20201216&item_count=1
```

```
&item1_id=SNP-201-000-01-100&item1_quantity=1
```

License Activation

■ User

- Directly with [WebDepot](#) or License Portal
- File-based with [WebDepot](#) or License Portal
- Online with Software Activation Wizard – [Gateway](#)

■ Vendor

- File-based with CodeMeter License Central User Interface
- Push Updates via User Interface

Lost Licenses

■ Cases

- Hardware crash
- Computer replacement
- Lost CmDongle
- Forgotten cloud password

■ How to handle

- Automatic reactivation
- Manual authorization of a new reactivation
- New cloud credential file

Reporting

- Show me all licenses stored in a specific CmContainer
- Show me all licenses that expire in the next 30 days
- Show me all CmContainers of a specific customer
- Show me all licenses associated with a specific ticket
- Show me the history of a license
- Show me if a blacklist lock was executed
- ...

Many thanks for your kind attention
